Complete cloud-based accounting & business management
designed for South African small to medium businesses

Table of Contents

Installation Steps

Steps to purchasing/trialing Rigel Business (Windows & macOS – with installation steps):

- The file will now look like this under your **Downloads** folder

- Double click it, and the **Installation Wizard** will be displayed. Once it does, click **Next**

- Read and Accept the the **Terms of Agreement**, then click **I Agree** and follow the prompts

- Once you get to this page, you can click **Finish** to finalize the Installation process, then **Launch Application**. The application is now ready!
- If it doesn't open immediately, simply re-open the installed file and your screen will appear as follows:

- Select either the **Transact** or **Register Company** buttons and your dashboard will appear in the following way

- If you have purchased the full version of the application, simply select “Activate Now” and fill in the required fields. Note that your license key is required in the following format: **RIGEL-XXXX-XXXX-XXXX-XXXX**. Once this form is complete, select **Activate License**.

The screenshot shows the 'Activate RIGEL Business' dialog box. The title bar reads 'Activate RIGEL Business'. The main heading is 'Activate Your License' with the instruction 'Enter the license key emailed after purchase.' Below this, there is a section for 'Your Machine ID (share this when purchasing):' with a text input field containing the value '0743924a8ff070dee8a65b01b1ce803f' and a 'Copy' button. Underneath, there are two more input fields: 'Company Name:' with the placeholder 'Your company name' and 'License Key:' with the placeholder 'RIGEL-XXXX-XXXX-XXXX-XXXX'. At the bottom of the dialog, there are two buttons: 'Cancel' and 'Activate License'.

1. System Overview

Rigel Business V4.1 is a fully integrated, cloud-based accounting and business management platform built by Stella Lumen (Pty) Ltd for South African small to medium enterprises (SMEs). The system consolidates all critical financial and operational functions into a single, formula-driven workbook — eliminating the need for multiple software packages or expensive ERP systems.

All financial statements, VAT returns, payroll, inventory, customer and supplier ledgers, fixed assets, loans, investments, directors' loans, and project accounting are handled seamlessly within one unified system.

Key System Highlights

- ✓ No internet connection required after download
- ✓ All data flows automatically — no manual posting of totals
- ✓ Navigation is 100% link-driven from the MAIN INDEX
- ✓ Fully South African tax-compliant (VAT, PAYE, UIF, SDL)
- ✓ Supports multi-period monthly reporting and year-end comparative analysis
- ✓ Unprotected (no password) — fully customisable

1.1 How Data Flows Through the System

Every transaction entered in a module immediately and automatically updates the following downstream reports and records:

1	Enter a transaction in the relevant module (Customers, Suppliers, Cash Book, Payroll, Assets, etc.)
2	The Master File for that entity updates instantly (running balances per month)
3	The General Ledger (GL) records the full double-entry with correct debit and credit columns
4	The Trial Balance (monthly and cumulative) reflects the updated account balances
5	VAT workings are updated automatically based on the transaction's VAT category
6	Financial Statements (Income Statement, Balance Sheet, Notes) reflect the live data immediately

✓ **TIP** No buttons need to be pressed after entering a transaction. Everything is formula-driven and updates in real time.

2. Getting Started

Before using any module in Rigel Business, you must complete the Registration sheet. This is the foundation of the entire system — every sheet pulls the company name, VAT status, chart of accounts, and prior-year balances from this central configuration page.

2.1 Registration Module

The Registration sheet is the first screen you will complete when setting up Rigel Business for a new company. It establishes the company's identity, tax configuration, banking details, and the opening chart of accounts (last-year balances).

RIGEL COMP.

NAME OF COMPANY
COMPANY REGISTRATION NO
Is the Company Registered for VAT
If Yes, VAT number
What is the Company Income Tax number
What is the start of the Financial Year

Figure 1: Company Registration Screen — complete all fields before proceeding

Fields to Complete on Registration

Sheet / Screen	Purpose / Description
Name of Company	Your registered trading name. This will appear on all reports, invoices, and payslips.
Company Registration No.	CK / CIPC registration number (e.g., CK-2026/05788/21).
VAT Registration	Select Yes/No. If yes, enter your VAT number. This controls whether VAT is calculated on transactions.
Income Tax Number	Your company's SARS income tax reference number.
Financial Year Start	The month your financial year begins (e.g., March). The system builds 12 months of reporting from this date.
Banking Details	Account holder name, bank name, branch code, and account number — used on tax invoices.
Company Address	Registered business address — appears on all customer-facing documents.
Contact Information	Telephone and email address.
Update Last Year	Enter opening balances (Category, Sub-Category, Account, Amount) for comparative reporting.

Opening Balances (Update Last Year)

Use the Category → Sub-Category → Account dropdowns to map each opening balance to the correct Chart of Accounts line.

Enter the Amount for each account.

Click Post to save each line. Click Edit to amend an existing entry.

These balances populate the 'Last Year' comparative columns in the Income Statement and Balance Sheet.

The Balance Sheet must balance (Assets = Equity + Liabilities) before you can proceed to transactions.

1	Open the Registration sheet from the MAIN INDEX or INDEX navigation menu.
2	Complete all company identification fields in the top section (grey-shaded cells are editable).
3	Enter banking details and company address.
4	Use the 'Update Last Year' section to post opening account balances using the dropdown menus.
5	Click 'Start Using' to navigate to the Main Menu. This button is only enabled once all mandatory fields are completed.

3. Navigation & Main Dashboard

Once registration is complete, all navigation is conducted from the INDEX (Main Dashboard). The dashboard provides hyperlink buttons to every module in the system. Clicking the company name or a HOME button on any sheet returns you to the INDEX.

Figure 2: Main Dashboard (INDEX) — central navigation hub for all modules

3.1 Dashboard Navigation Groups

Sheet / Screen	Purpose / Description
REPORTING	Income Statement, Balance Sheet, Cash Flow Statement, Statement of Changes in Equity, Notes to Financial Statements.
MONITORING	Management Accounts, Company Performance, Trial Balance, General Ledger, Adjustments, VAT Account, Registration.
CASH	Cash Book and Cash Book Transactions.
SUPPLIER	Suppliers module, Supplier Masterfile, Supplier Transactions.
ASSETS	Fixed Assets, Asset Register.
LOANS	Loan Masterfile, Add Loan.
INVESTMENTS	Investments, Add Investment.
PROJECTS	Projects, Project Masterfile, Project Transactions.
VIEW MONTH	Select the reporting month using the dropdown. All dashboards, performance charts, and comparative reports update to the selected month.

✓ **TIP** Click any blue underlined hyperlink text to jump directly to that module. Use the company name banner or HOME link on most sheets to return to the dashboard.

4. Core Framework — Financial Accounting

4.1 Trial Balance & TB Monthly

The Trial Balance is the backbone of the Rigel accounting engine. It displays the Chart of Accounts with running debit and credit balances, updated in real time from every posted transaction across all modules.

META-AI (PTY) L
CHART OF ACCOUNTS

ACCOUNT CODE	CATEGORY
I001	Revenue
I005	Revenue
E001	Expenditure
E002	Expenditure
E003	Expenditure
E013	Expenditure
A001	Assets
A002	Assets
A031	Assets
A032	Assets
A033	Assets
A042	Assets
A043	Assets
A046	Assets
L001	Liabilities
L002	Liabilities
L015	Liabilities
NA001	Equity
NA003	Equity

Figure 3: Trial Balance — Chart of Accounts with live account codes and categories

Sheet / Screen	Purpose / Description
Trial Balance	Cumulative annual balances per account. Shows Account Code, Category, Sub-Category, and balances across the financial year.
TB Monthly	Month-by-month view of each account balance. Use this for period analysis and to verify posting accuracy.

4.2 General Ledger (GL)

The General Ledger provides a complete, double-entry view of every transaction posted to the system. Each line shows the date, transaction code, system code, nature of transaction, debit account, credit account, VAT inclusive amount, VAT exclusive amount, and VAT amount.

GL NAME	GL NATURE OF TR	GL ACCOUNT	GL VAT INCL
			-
ST-SUPP-TEST-01	Account Payment - Supplier		500.00
ST-SUPP-TEST-03	Account Payment - Supplier		2,500.00
		Commission Exp	7,500.00
	Cash Purchasing - InventoryCash	Buildings - Costl	34,500.00
	Cash Purchasing - Inventory	INV-002	34,500.00
	Cash Purchase	Vehicles - Cost	450,000.00
	Cash Purchase	Vehicles - Cost	450,000.00
ST-SUPP-04	Account Payment - Supplier		1,500.00
	Cash Purchase	Buildings - Cost	450,000.00
	Cash Purchase	Buildings - Cost	1,000,000.00
	Cash Purchasing - Inventory	I - 1	1,000.00
	Make Investment		5,500.00
	Receive Lumpsum		10,500.00
	Interest on Investments		12,000.00
	Loan Repayment		65,000.00

Figure 4: General Ledger — full double-entry transaction ledger (view only)

✓ **TIP** The GL is a view-only screen. All entries are generated automatically by the system when transactions are posted in the relevant module. Never attempt to edit GL entries directly.

4.3 VAT Module

The VAT module calculates VAT Input and VAT Output automatically from all posted transactions. A running SARS VAT liability is maintained per month, with a cumulative balance carried forward.

META-AI (PTY) LTD

VAT

CATEGORY	SUB-CATEGORY
BALANCE FROM VAT OUTPUT	PREVIOUS MONTH
	Cash Sales
	Credit Sales
TOTAL VA	
VAT INPUT	Cash Purchases
	Credit Purchases
TOTAL V	

Figure 5: VAT Account — automatic monthly VAT input/output tracking with SARS liability balance

Sheet / Screen	Purpose / Description
VAT Output	VAT collected on sales transactions (credit sales, cash sales). Increases the SARS liability.
VAT Input	VAT paid on purchases (stock, expenses, assets). Reduces the SARS liability.
Balance from Previous Month	The closing SARS VAT liability carried forward each month.
Net VAT Due to SARS	VAT Output minus VAT Input for each period — this is the amount payable to SARS.

4.4 Adjustments Module

The Adjustments module allows you to post manual journal entries for period-end adjustments, reclassifications, accruals, and provisions. Every adjustment entry must balance (total debits must equal total credits) before posting is permitted.

DATE	
ACCOUNT CODE	
CATEGORY	#NAME?
SUBCATEGORY	#NAME?
ACCOUNT CODE	#NAME?
ACTION	
AMOUNT	
COMMENT	

Figure 6: Adjustments Module — period-end manual journal entry screen

1	Navigate to Adjustments from the INDEX dashboard.
2	Enter the Date for the adjustment.
3	Select the Account Code from the dropdown for the debit leg.
4	Enter the debit amount.
5	Select the Account Code for the credit leg and enter the credit amount.
6	Enter a Description / Reason (mandatory — posting will be blocked without this).
7	Click Post. The system validates that debits equal credits before writing the entry.

Audit Trail

All adjustment entries are logged with the user, date, time, reason, debit/credit accounts, and before/after balances.

This provides a complete audit trail of all manual interventions to the accounts.

5. Financial Statements & Reporting

All financial statements in Rigel Business pull live data directly from the General Ledger and Trial Balance. No manual input is required on any financial statement screen — all figures are formula-driven and update automatically with every posted transaction.

5.1 Income Statement (IS)

The Income Statement displays revenue, gross profit, operating expenses, and net income for the current year versus the prior year (Last Year comparative). The structure follows the RIGEL Chart of Accounts hierarchy.

	META-AI (PTY) LTD INCOME STATEMENT
	REVENUE FROM TRADING
	<i>Trade_Revenue</i>
	<i>Trade_Expenditure</i>
	GROSS PROFIT
	<i>Investment_Revenue</i>
	GROSS INCOME
	<i>Operating_Expenditure</i>
	TOTAL EXPENDITURE
	NET INCOME BEFORE TAX
	NET INCOME AFTER TAX
	NET INCOME FOR THE YEAR

Figure 7: Income Statement — current year vs last year comparative, fully formula-driven

Sheet / Screen	Purpose / Description
Revenue from Trading Activities	Trade Revenue (sales) less Trade Expenditure (cost of goods sold) = Gross Profit.
Investment Revenue	Income from investments (interest received, dividends received).
Gross Income	Gross Profit plus Investment Revenue.
Operating Expenditure	All operating expenses (salaries, rent, utilities, etc.).
Net Income Before Tax	Gross Income minus Total Expenditure.
Net Income After Tax	Net Income Before Tax less income tax provision.
Net Income for the Year	Final bottom-line profit / (loss) for the financial year.

5.2 Balance Sheet (BS)

The Balance Sheet displays the company's financial position at any point in time, with current year and prior year comparative columns. It includes notes references that link directly to the AFS Notes sheet.

META-AI (PTY) LTD BALANCE SHEET

	Note

Property, Plant and Equipment	1
Investments	4
CURRENT ASSETS	
Inventories	
Cash And cash Equivalents	
SARS Asset	
TOTAL ASSETS	
CURRENT LIABILITIES	
Trade Payables	
TOTAL LIABILITIES	
EQUITY	
Retained Earnings	
Profit/ Loss for the Current year	
TOTAL EQUITY AND LIABILITIES	

Figure 8: Balance Sheet — assets, liabilities, equity with note references and prior year comparative

Sheet / Screen	Purpose / Description
Non-Current Assets	Property, plant & equipment (net of depreciation), long-term investments, loans to directors.
Current Assets	Inventory, trade receivables, cash & cash equivalents, VAT input balance.
Non-Current Liabilities	Long-term loans, loans from directors.
Current Liabilities	Trade payables, SARS liabilities (VAT, PAYE, UIF, SDL), customer deposits.
Equity	Share capital, retained earnings. Retained Earnings = prior year retained earnings + net income for the year.

✓ **TIP** The Balance Sheet must always balance: Total Assets = Total Equity + Total Liabilities. If it does not balance, review your Registration entries and posted transactions.

5.3 Statement of Changes in Net Assets (Net Assts)

This statement tracks movements in equity during the financial year, including opening retained earnings, net income for the year, dividends declared, and any capital contributions or withdrawals.

5.4 Notes to the Financial Statements

The Notes sheet provides detailed schedules supporting the Balance Sheet and Income Statement figures, including the Property, Plant & Equipment (PPE) reconciliation, long-term loan schedules, taxation notes, and SARS liability breakdowns. All note figures are linked directly from the GL and are not manually entered.

5.5 Performance Dashboard

The Performance dashboard provides a graphical view of key business metrics over the 12-month financial year — including revenue trends, net profit, working capital movements, cash position, SARS obligations, creditors, and debtors.

Figure 9: Company Performance — 12-month graphical dashboard of key financial metrics

Sheet/Screen	Purpose/Description
Working Capital Chart	Monthly trend of Cash, SARS Liability, Creditors (Trade Payables), and Debtors (Trade Receivables).
Net Profit Trend	Month-by-month net profit/(loss) bar chart.
Revenue vs Expenditure	Comparative bar chart of total revenue vs total expenditure per month.
Navigation Buttons	Quick-access buttons to ASSETS, LOANS, INVESTMENTS, and PROJECTS from the performance screen.

6. Cash Management

The Cash Book module records all cash and bank transactions, including receipts and payments. It feeds directly into the Trial Balance, Balance Sheet (Cash & Cash Equivalents), and all related reports.

6.1 Cash Book

Sheet / Screen	Purpose / Description
Cash Book	Main entry screen. Enter date, document number (optional), description, nature of transaction (from dropdown), and amount.
Cash Book Transactions	Detailed transaction listing — all posted cash/bank entries with full posting details to GL, TB, and BS.
Opening Bank Balance	Enter the opening bank balance for the financial year. This is auto-

Sheet / Screen	Purpose / Description
	populated from the Registration Last Year closing balance but can be overridden.

Nature of Transaction — Cash Book

Always select the correct Nature of Transaction from the dropdown list.

This controls which GL accounts are debited and credited automatically.

Examples: Cash_Receipt, Cash_Payment, Bank_Charges, Interest_Received, Loan_Repayment.

1	Navigate to Cash Book from the INDEX or CASH button on the dashboard.
2	Enter the transaction Date in the blue/grey input cell.
3	Enter the Document Number (e.g., bank statement reference) — optional.
4	Enter a Description for the transaction.
5	Select the Nature of Transaction from the dropdown list.
6	Enter the Amount (VAT inclusive where applicable).
7	Click Post Transaction. The GL, TB, and BS update immediately.

7. Fixed Assets Management

The Fixed Assets module manages the full lifecycle of the company's property, plant and equipment — from acquisition through to disposal. Depreciation is calculated monthly and posted automatically to the Income Statement and Balance Sheet.

7.1 Assets & Asset Register

META-AI (PTY) LTD

Figure 11: Update Asset Register — asset acquisition entry with purchase date, cost, VAT, and disposal details

Sheet / Screen	Purpose / Description
Assets	Transaction entry screen for new asset acquisitions. Select Asset Class, enter purchase date, amount (VAT inclusive), and VAT amount.
Asset Register	Complete register showing all assets at cost, accumulated depreciation, and carrying value (net book value) per month.

Sheet / Screen	Purpose / Description
Buildings	Immovable property owned by the company.
Vehicles	Motor vehicles — company cars, delivery trucks, etc.
Furniture	Office furniture and fittings.
Computer Equipment	Computers, servers, laptops, printers, and related equipment.
Fittings	Fixtures and shopfitting assets.

Asset Posting — What Happens Automatically

Dr Property, Plant & Equipment (class-specific account) — net cost (excluding VAT)

Dr VAT Input (Current Asset) — VAT portion of the purchase price

Cr Cash & Cash Equivalents — gross amount (VAT inclusive)

Depreciation is calculated monthly and posted: Dr Depreciation Expense / Cr Accumulated Depreciation.

AFS Note 1 (PPE Schedule) updates automatically showing cost, additions, depreciation, and carrying value.

- 1 Navigate to Assets from the INDEX → ASSETS button.
- 2 Select the Asset Class from the dropdown (Buildings, Vehicles, Furniture, Computer Equipment, or Fittings).
- 3 Enter the Date Purchased, Amount VAT Inclusive, Amount VAT Exclusive, and VAT.
- 4 If disposing of an asset: enter Date Sold and Amount of Sale.
- 5 Click Post. The Asset Register, GL, TB, and BS update immediately.

✓ **TIP** For asset disposals, the system calculates the gain or loss automatically (Proceeds minus Carrying Value) and posts the gain/loss to the Income Statement under Other Income or Other Expenses.

8. Human Resources & Payroll

The Payroll module handles the full employee payroll cycle — from capturing employee master data through to calculating statutory deductions (PAYE, UIF, SDL) and generating payslips. The module uses the latest SARS 2025/2026 tax tables.

8.1 Employees & Employee Masterdata

The Employees sheet stores all employee master records. Each employee is assigned a unique Employee Code that links all payroll transactions to their record in the Masterdata view.

Sheet / Screen	Purpose / Description
Employees	Employee master data: name, surname, ID number, tax number, bank account details, date of birth, salary details, and tax status.
Employee Masterdata	Running payroll history per employee — gross pay, deductions, net pay, and advance/loan balances per month.
Tax Tables	SARS 2025/2026 tax tables for PAYE calculation. UIF (1% employee + 1% employer) and SDL (1% of leviable amount) thresholds are also maintained here.
Employee Transactions	Detailed payroll transaction listing — every salary run posted with gross pay, UIF employer, UIF employee, PAYE, and net pay columns.

8.2 Payslip

The Payslip sheet generates a professional individual payslip for any employee by selecting their Employee Code. The payslip automatically pulls company information, employee details, and the latest pay run figures.

PAYSリップ

Figure 12: Payslip — auto-generated payslip with gross pay, statutory deductions, and net pay

Payroll Posting — What Happens Automatically

Dr Salaries & Wages (IS Expense) — gross salary amount
 Cr Cash & Cash Equivalents — net pay (cash paid to employee)
 Cr PAYE Payable (Liability) — PAYE withheld
 Cr UIF Payable (Liability) — UIF employee + employer contributions
 Cr SDL Payable (Liability) — skills development levy
 All statutory liabilities appear in the Balance Sheet until paid to SARS.

- 1 Add the employee to the Employees masterfile with all required fields.
- 2 Navigate to Employee Transactions and select the employee.
- 3 Enter the pay period month and gross salary.
- 4 The system automatically calculates PAYE (using SARS tax tables), UIF (employee and

	employer), and SDL.
5	Review the net pay and deduction breakdown.
6	Click Post to record the payroll run. GL, TB, IS, and BS all update immediately.
7	Navigate to Payslip and select the employee to generate and print their individual payslip.

9. Inventory / Stock Management

The Inventory module manages the full stock lifecycle — from stock receipts and issues through to adjustments and write-offs. Inventory is tracked on a perpetual basis with monthly quantity and average cost calculations feeding into Cost of Sales on the Income Statement.

9.1 Inventory Sheets Overview

Sheet / Screen	Purpose / Description
Inventories	Transaction entry screen for stock movements. Select transaction type (Stock Receipt, Stock Issue, Adjustment) and enter details.
Inventory Masterdata	Perpetual inventory master — quantity on hand, average cost per unit, and total inventory value per month.
Inventory Register	Complete item register with item codes, descriptions, cost price, selling price, and location.
Inventory Activity	Full movement history — every receipt, issue, and adjustment with dates and quantities.
Inventory Transactions	Detailed transaction listing with VAT calculations and GL posting details.

INVENTORY SYSTEM CODE	CATEGORY1	CATEGORY2	CATEGORY3
ST-INV-CODE-001			
INV-002			
INV-002			
I - 1			
I - 1			

Figure 13: Inventory Module — stock transaction entry with quantity and price fields

Inventory Posting — What Happens Automatically

Stock Receipt: Dr Inventory (Current Asset) / Cr Cash or Trade Payables / Dr VAT Input

Stock Issue (Sale): Dr Cost of Goods Sold (IS Expense) / Cr Inventory (BS Current Asset decreases)

Stock Adjustment (Write-Off): Dr Inventory Write-Off Expense / Cr Inventory

COGS only appears in the IS when stock is issued/sold — stock receipts are capitalised to the Balance Sheet.

- 1 Add inventory items to the Inventory Register with item code, description, cost price, selling price, unit of measure.
- 2 Navigate to Inventories to post stock movements.
- 3 Select the transaction type: Stock Receipt (purchase), Stock Issue (sale/issue), or Adjustment (write-off/variance).

4	Select the Item Code from the dropdown.
5	Enter Quantity and Price per unit (VAT inclusive).
6	Click Post. The Inventory Masterdata, GL, TB, IS (COGS), and BS (Inventory balance) update immediately.

10. Customers / Sales / Accounts Receivable

The Customers module manages the full sales cycle — from recording credit sales and cash sales to processing receipts, credit notes, and customer deposits. The Customer Masterfile tracks outstanding balances per customer per month.

10.1 Customer Sheets Overview

Sheet / Screen	Purpose / Description
Customers	Navigation hub to customer sub-modules and transaction entry.
Customer Masterfile	Full customer list with outstanding balances tracked per month across the 12-month period.
Transactions	Credit sales, cash sales, account payments (receipts), credit notes, and deposit transactions.
Invoice Template	Professional tax invoice — auto-populated when a credit sale transaction is posted. Pulls company details, customer details, and line items automatically.

Supported Customer Transaction Types

Credit Sale — Inventory: Dr Trade Receivables / Cr Sales Revenue / Cr VAT Output
 Cash Sale — Services: Dr Cash & Cash Equivalents / Cr Sales Revenue / Cr VAT Output
 Account Payment (Receipt): Dr Cash & Cash Equivalents / Cr Trade Receivables
 Credit Note: Dr Sales Revenue / Cr Trade Receivables
 Receive Deposit: Dr Cash / Cr Customer Deposits Received (Liability) — does NOT reduce Trade Receivables
 Refund Deposit: Dr Customer Deposits Received (Liability) / Cr Cash

1	Add customers to the Customer Masterfile with customer code, name, and contact details.
2	Navigate to Transactions and select the Nature of Transaction from the dropdown.
3	Select the Customer Code and enter the transaction date, document number, and amount.
4	Click Post Transaction. A unique transaction code (e.g., CUS-2026-0001) is auto-generated.
5	View Transactions lists all posted entries. The Customer Masterfile updates the customer's outstanding balance.
6	For credit sales, navigate to Invoice Template to view and print the auto-generated tax invoice.
✓ TIP Always use the Nature of Transaction dropdown to ensure the correct double-entry is applied. Selecting the wrong nature of transaction will result in incorrect GL postings and financial statement figures.	

11. Suppliers / Purchases / Accounts Payable

The Suppliers module is the mirror of the Customers module — it handles all purchase transactions including credit purchases, cash purchases, payments to suppliers, credit notes received, and inventory purchasing. The Supplier Masterfile tracks outstanding balances per supplier per month.

11.1 Supplier Sheets Overview

Sheet / Screen	Purpose / Description
Suppliers	Navigation hub to supplier sub-modules and transaction entry.
Supplier Masterfile	Full supplier list with outstanding Accounts Payable balances tracked per month.
Supplier Transactions	Detailed listing of all posted supplier transactions with GL posting details.

Supported Supplier Transaction Types

Credit Purchase: Dr Inventory or Expense Account / Dr VAT Input / Cr Trade Payables
 Cash Purchase: Dr Inventory or Expense Account / Dr VAT Input / Cr Cash & Cash Equivalents
 Account Payment (Payment to Supplier): Dr Trade Payables / Cr Cash & Cash Equivalents
 Credit Note Received: Dr Trade Payables / Cr Inventory or Expense Account / Cr VAT Input
 Cash Purchasing — Inventory: Dr Inventory / Dr VAT Input / Cr Cash

✓ **TIP** The Suppliers module structure is identical to the Customers module. All navigation, posting steps, and view transaction features work the same way.

12. Investments & Loans

12.1 Investments

The Investments module tracks all bank and investment accounts — fixed deposits, money market accounts, and other investment vehicles. Interest earned is recorded and flows automatically to Investment Revenue in the Income Statement.

Sheet / Screen	Purpose / Description
Add Investment	Entry screen to add a new investment account — institution name, account number, opening balance, and interest rate.
Investments	Master view of all investment accounts with monthly balance tracking, interest accruals, and transaction history.

12.2 Loans

The Loans module manages all long-term borrowings, including bank loans, institutional financing, and other debt instruments. Interest calculations are handled automatically and posted to the Income Statement.

Sheet / Screen	Purpose / Description
Add Loan	Entry screen to add a new loan — lender name, loan amount, interest rate, repayment terms, and start date.
Loan Masterfile	Complete loan register with outstanding balance, monthly repayment schedule, interest posted, and capital repaid per month.

Loan Repayment Posting — What Happens Automatically

Interest portion: Dr Interest Expense (IS Expense) / Cr Loan Account

Capital repayment: Dr Loan Account (Liability reduces) / Cr Cash & Cash Equivalents

AFS Notes include a Loans schedule showing outstanding balance, interest rate, and repayment terms.

13. Directors / Shareholders Module

The Directors module manages all financial transactions between the company and its directors or shareholders — including director loans (both directions), dividend declarations, and dividend tax calculations.

Figure 14: Directors Module — GL Helper showing nature of transaction mapping for director entries

13.1 Director Sheets Overview

Sheet / Screen	Purpose / Description
Add Director	Add a new director/shareholder — name, ID number, shareholding percentage, and classification.
Directors	Director master view with outstanding loan balances tracked per month (both loans from and loans to directors).

Sheet / Screen	Purpose / Description
Director Transact Entry	Transaction entry screen for dividend payments and director loan transactions.
Director Transactions	Detailed listing of all posted director transactions with GL posting codes and amounts.

Supported Director Transaction Types

Pay Dividend: Dr Dividends Declared (Equity) / Dr Dividends Tax Payable (20% SARS liability) / Cr Cash (gross amount)

Loan by Director (company borrows from director): Dr Cash / Cr Loans from Directors (Liability)

Loan to Director (company lends to director): Dr Loans to Directors (Asset) / Cr Cash

Dividends Tax: 20% of gross dividend withheld and payable to SARS. Net payment to director = 80% of gross.

✓ **TIP** Director loan balances are tracked per director per month in the Director Masterfile. Loan by Director = positive effect on the outstanding balance; Loan to Director = negative effect (from the company's perspective).

14. Projects Module

The Projects module provides job-costing functionality — allowing income and expenses to be allocated to specific projects at the point of posting. Project reporting shows Budget vs Actual, Project P&L, and WIP (Work In Progress) balances per project.

Sheet / Screen	Purpose / Description
Projects	Project master list — all active and inactive projects with status indicators and budget amounts.
Project Masterfile	Detailed project view with budget, actual income, actual costs, and variance per project.
Project Transaction	Listing of all transactions allocated to each project with amounts and GL account details.

Important: How Project Allocation Works

Project coding is an additional dimension — it does NOT change the standard accounting treatment.

A transaction allocated to a project still posts normally to the GL, TB, IS, and BS.

Project allocation is optional — transactions without a project code post as normal.

Project totals must reconcile to the main Income Statement figures.

1	Create projects in the Projects screen: enter Project Code (unique), Project Name, Budget, and Status (Active/Inactive).
2	When posting transactions in any module (Expenses, Customers, Assets, etc.), select the Project Code from the dropdown to allocate the transaction to a project.
3	View the Project Masterfile to see Budget vs Actual comparison, Project P&L, and WIP balances.
4	Use Project Transactions to drill into the detail of all allocations for a specific project.

15. Tips, Best Practices & Troubleshooting

15.1 Daily Use Best Practices

✓	Always enter transactions in the correct coloured input sections — grey or blue shaded cells are editable; white cells are locked.
✓	Use the supplied dropdown lists for Nature of Transaction — never type free-form entries as this will break the GL posting logic.
✓	Back up the workbook file regularly (at minimum daily, or after every significant batch of transactions).
✓	Use the VIEW MONTH selector on the dashboard to review any historical month's performance data.
✓	Check that the Balance Sheet balances (Total Assets = Total Equity + Liabilities) at least monthly.
✓	Reconcile the Cash Book to your bank statement at least monthly to catch any missing entries.

15.2 Common Issues & Resolution

Sheet / Screen	Purpose / Description
Balance Sheet does not balance	Review Registration entries — ensure all opening balances map to correct Chart of Accounts lines. Check for any transactions posted to wrong accounts via Adjustments.
#NAME? errors in reports	Usually caused by the financial year not being set correctly in Registration, or the selected View Month being outside the system's date range.
VAT balance seems incorrect	Navigate to the VAT module and review the Input and Output balances per month. Check that VAT-applicable transactions have the correct Nature of Transaction selected.
Inventory balance differs from stock count	Use Inventory Activity to review all stock movements. Post an Adjustment transaction for any count variances.
Payslip shows #NAME? errors	Ensure the employee's record in the Employees masterfile is fully completed, including all mandatory fields and correct tax status.
Transaction does not appear in GL	Ensure the transaction was posted (clicked Post Transaction) and not just entered. Unposted transactions do not update the GL.

15.3 Sheet Protection

All sheets in Rigel Business are protected but not password-locked. This means:

- Editable cells (grey or blue shaded) accept input normally.
- Locked cells (white background) cannot be edited — clicking them produces no error dialog.
- If you need to customise a sheet or formula, you can unprotect the sheet via Excel's Review → Unprotect Sheet (no password required).
- Customisations to core formula cells should be done with care to avoid disrupting the data flow chain.

15.4 Support & Custom Modifications

For technical support, bug reports, or requests for custom modifications to your Rigel Business workbook, contact the Stella Lumen development team:

Developer Contact — Stella Lumen (Pty) Ltd

Lead Developer: Thabani Zulu

Email: info@stella-lumen.com

Telephone: 031 944 4635

Reference your company name and describe the module and issue in detail when contacting support.

16. Module Quick Reference

The table below provides a complete index of all sheets in Rigel Business V4.1, grouped by functional module, with a brief description of each sheet's purpose.

Sheet / Screen	Purpose / Description
MAIN INDEX	Hidden landing page — system entry point.
Registration	Company setup: name, VAT, tax, banking, chart of accounts opening balances.
INDEX	Central navigation dashboard with hyperlinks to all modules.
Trial Balance	Chart of Accounts with cumulative annual debit/credit balances.
TB Monthly	Month-by-month balance per account across the 12-month financial year.
GL	Full double-entry General Ledger — view only, auto-populated from all modules.
GL Helper	System reference for transaction natures, VAT codes, and GL account mappings.
VAT	Monthly VAT Input/Output tracking and running SARS VAT liability.
Adjustments	Manual journal entry screen for period-end and reclassification adjustments.
Performance	12-month graphical performance dashboard — revenue, profit, working capital.
IC (Income Statement)	Revenue, gross profit, operating expenses, and net income — current vs last year.
Net Assts	Statement of Changes in Net Assets / Equity.
BS (Balance Sheet)	Assets, liabilities, and equity with note references and prior year comparative.
Notes	AFS Notes: PPE schedule, loan schedules, tax notes, SARS liability detail.
Cash Book	Cash/bank transaction entry — receipts and payments with nature of transaction.
Cash Book Transactions	Detailed cash book transaction listing with GL posting details.
Assets	Fixed asset acquisition and disposal entry screen.
Asset Register	Complete PPE register — cost, accumulated depreciation, carrying value per month.
Employees	Employee master data — personal details, banking, tax status, salary.
Employee Masterdata	Running payroll history per employee — gross pay, deductions, net pay.
Tax Tables	SARS 2025/2026 PAYE, UIF, and SDL tables used for automatic calculations.
Payslip	Individual payslip generation — select employee to auto-populate all fields.
Employee Transactions	Complete payroll transaction listing per pay period.
Inventories	Stock movement entry — receipts, issues, adjustments.
Inventory Activity	Full inventory movement history — all receipts, issues, and adjustments.
Inventory Masterdata	Perpetual inventory — quantity on hand and average cost per month.
Inventory Register	Item master: codes, descriptions, cost price, selling price, unit of measure.
Inventory Transactions	Detailed inventory transaction listing with VAT and GL details.
Customers	Customer navigation hub — links to masterfile, transactions, and invoice.

Sheet / Screen	Purpose / Description
Customer Masterfile	Full customer list with outstanding AR balances tracked per month.
Transactions	Customer sales and receipt transactions — credit sales, cash sales, payments.
Invoice Template	Auto-generated professional tax invoice — populated from transaction data.
Add Investment	Entry screen to add a new investment account.
Investments	Investment master — balances, interest, and transaction history.
Suppliers	Supplier navigation hub — links to masterfile and transactions.
Supplier Masterfile	Full supplier list with outstanding AP balances tracked per month.
Supplier Transactions	Detailed supplier transaction listing with GL posting details.
Add Loan	Entry screen to add a new long-term loan.
Loan Masterfile	Loan register — outstanding balance, repayment schedule, interest per month.
Add Director	Director/shareholder master data entry.
Directors	Director overview — loan balances per director per month.
Director Transact Entry	Transaction entry for dividends and director loans.
Director Transactions	Detailed director transaction listing with GL posting details.
Projects	Project master list with status and budget.
Project Masterfile	Budget vs Actual, Project P&L, and WIP per project.
Project Transaction	Transaction listing for all project-allocated entries.
